Data!

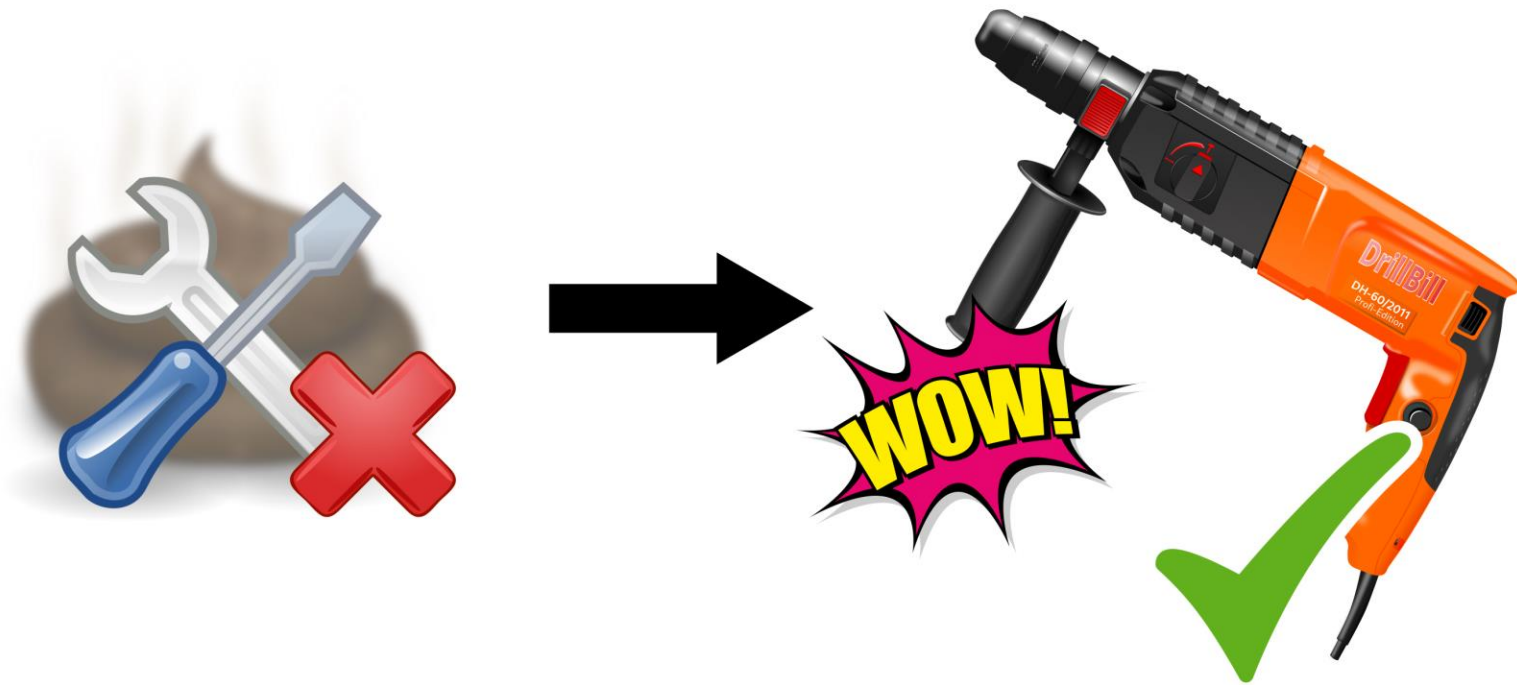

Conflicting objectives with various tradeoffs

Decision makers have vast domain expertise

We need better decision-support tools!

But how do the tools work?

It sure is fancy,
but how does it
work?

Explainability!

Explainability!

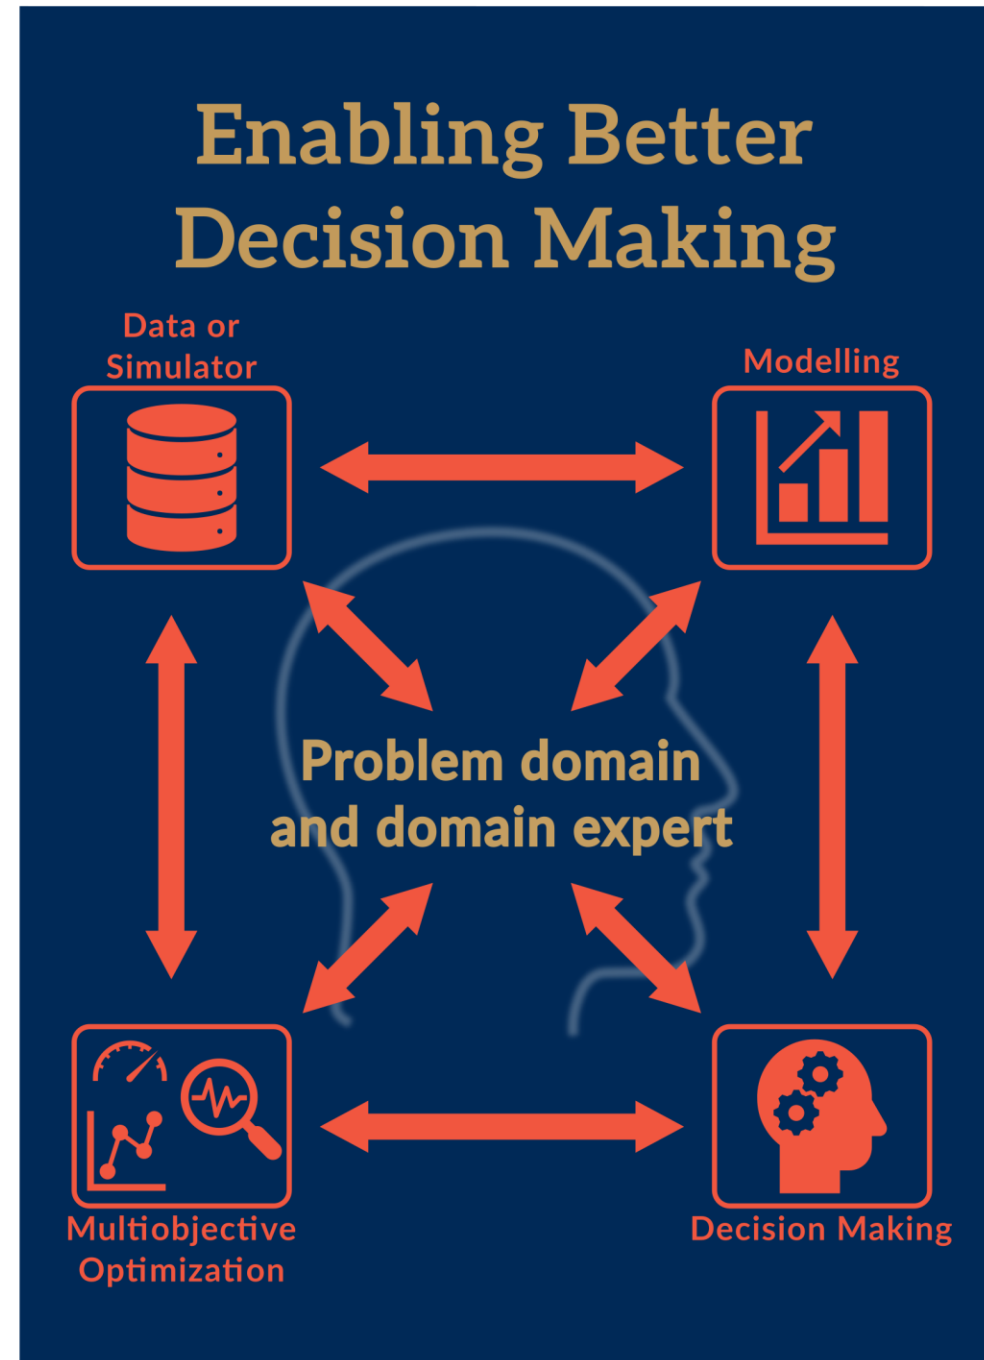

I use electricity
and friction to
bore holes.

Ohh! I see
now!

Explainable multiobjective optimization

Better insights!

Did you notice you could
decrease emissions by 90%
by increasing costs by 2%?

Actually, I
did not!

The beneficiaries of explainability

Domain experts

Policy-makers

Stakeholders

General public

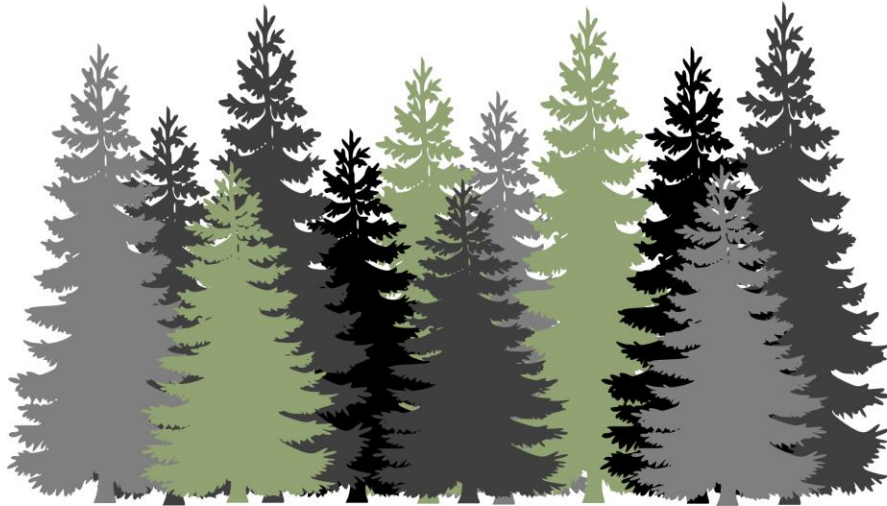

Multiojective Optimization (research) Group

UNIVERSITY OF JYVÄSKYLÄ

**We have applied our tools in
the past to support real
decision makers!**

**Mission: develop explainable
multiobjective optimization to be
mature enough to be applied!**

Next-generation of explainable and human comprehensible decision- support tools

Thank you!
